Speaker

European companies are leading the world in sustainability and have a lot to contribute to accelerate smart & sustainable cities in Korea and around the world. Cities emit 70-80% of global GHG and, with increasing urbanization, smart cities can be a major part of the solution to our energy and climate crises. With almost 50 billion SQM of buildings to be built in Asia by 2030, European companies can play a pivotal role to help Asian cities build more sustainably and help achieve the COP 21 targets by accelerating smart buildings, smart infrastructure, smart mobility, smart healthcare, smart living, smart governance with IoT, big data and living lab solutions.

Chungha Cha
Co-founder & Chair

“ ... From Green Buildings to Smart Cities!”

Cha has been in the finance industry for 20+ years with various financial institutions. Since 2007, Cha’s passion for sustainability led him and his partners to establish Re-Imagining Cities Foundation under the Korea Green Building Council non-profit umbrella. We share a vision for our future with 100% renewable energy, clean air and a happy, healthy environment where we can all live, work and play in harmony with nature.

Our global collaboration partners include the World Green Building Council, Global Real Estate Sustainability Benchmark (GRESB), Andalusia Smart City Cluster, Architecture 2030, amongst others. Cha also serves as Vice Chairman of the Korean Green Building Council, Co-Chair, Green Working Group of the European Chamber of Commerce, Sustainability Advisor to the Andalusia Smart City Cluster and LG Group.
