

ECCK Live Webinar on Enhancing Supply Chain Resilience

EVENT OUTLINE

In order to keep our intricately connected world operating, properly functioning supply chains are of key importance. These make it possible to secure that goods evolve from raw materials into products and reach their destination at the right moment. Properly functioning supply chains rarely just materialize and are rather a result of successfully aligning all separate components, building in contingencies as well as incorporating technological developments. During this webinar expert speakers will share their insights on how the resilience of their supply chain is enhanced and where possible challenges remain.
