

AN AQUILA CAPITAL/TOPINFRA JV

Aquila Development Partners (ADP) is a Korean development platform that focuses on greenfield renewable energy projects in solar, wind and battery storage. Founded as a joint venture by TopInfra and Aquila Capital, ADP combines best in class Korean and international practices and aims to be recognised as a leader in Korea's energy transition. Sustainability is at the core of the ADP value system and is an integral part of its development strategy and processes, and construction and management of assets. With the support of its shareholders, ADP draws on extensive technical capability across the solar, wind and storage sectors, providing its team members numerous opportunities for continuous learning, career growth, and advancement. At launch, ADP had a project pipeline of ~1GW and is supported by a board and senior management with a combined 67 years of clean energy experience and over 1,900 MW of renewable energy transactions closed across Asia Pacific.

For our office in Seoul we are looking for an experienced

Investment and Development Manager Renewable Energy (f/m/d)

Your responsibilities

- Identify new project/ investment opportunities for solar PV, wind or other renewable energies in Korea
- Negotiate a set of key terms to (co-)develop or acquire greenfield or brownfield project portfolios in close collaboration with our in-house investment-, technical- and legal team
- Present development and/or investment opportunities to the management based on holistic consideration of financial models, permitting status and other critical techno-economic success factors
- Collaborate with local development partners to successfully manage the development and permitting process from acquisition to ready-to-built stage
- Support preparation of information memos and data for presentation to the investment committee incl. risk management strategies
- Stay up to date on latest market developments and news, policy changes and identify mid- to long-term business opportunities

Your qualifications

- At least 5 years of relevant project/ business development experience in renewable energy projects; preferably with an internationally experienced company
- Deep understanding and experience of local interaction with authorities, local communities, and other stakeholders
- Experience in project management methodologies is considered an advantage
- Financial modelling or relevant technical engineering capability is a plus
- Strong 360-degree communication skills both in Korean and English

Your prospects

We are a future-oriented company that combines focus, far-sightedness, ambition and independent entrepreneurial responsibility with team spirit and an outstanding corporate climate to create synergies. Combined with our employees' talents, these synergies are the key to the success of our company.
