

ECCK Information Session on better way of team performance

EVENT OUTLINE

In today's complex, rapidly changing world of work, more and more companies are rethinking and increasingly relying on the counter-concept: psychological safety. Instead of creating as much pressure as possible to spur employees to perform at their best, companies want to create a safe work atmosphere where employees feel comfortable and in control.

Psychological safety is the critical foundation for companies to allow the potential of their teams and the individual strengths of employees to become effective and productive.

I will introduce you to my method of analysis, with the help of which I localize sources of energy and energy guzzlers within a team.

Subsequently, I will also present my consulting approach, which begins with strengthening the healthy "I" and is an important prerequisite for jointly developing a high-performance and high-energy "WE".
