

# ECCK LIVE WEBINAR ON "G-20 COUNTRIES' DECARBONIZATION STRATEGIES AND IMPLICATIONS FOR KOREA"

---

## EVENT OUTLINE

G-20 countries account for more than 70% of global greenhouse gas emissions. And majority of G-20 members, including the EU and South Korea, have already legislated net-zero emission by 2050 goals. This November in parallel with COP27, the United Nations Climate Change Conference taking place in Egypt, Indonesia is hosting the G-20 Summit along with affiliated business-led events such as B20 and BloombergNEF Bali Summit, with Sustainable Energy Transition as one of the main themes.

Join us for a recap of COP27 and G-20 focused on the latest decarbonization goals and strategies of businesses and governments from across G-20 in particular South Korea and the EU.

---
