# Leading the Future

Our goal at Air Liquide is to support, encourage, and advocate for women and female future talents in STEM (Science, technology, engineering, and mathematics) fields. We think that gender equality and diversity further promote creativity, stronger teamwork, and more opportunity for everyone. Through the **"Leading the Future: Women Leading in Science & Technology (STEM) Information Session Forum"**, we would like to provide participants with an opportunity to hear insights from French & Korean leaders and network with fellow participants from various backgrounds and expertise.

Dr. Heejeong Jeong is a Head of Quantum Computing at Pasqal Korea. Heejeong received her Ph.D. in Physics, Quantum Optics/AMO from Duke Univ. in 2006 and has an extensive background in the deep science area. Her experience includes Research Staff at SAIT, Associate Professor at Univ. of Malaya, Vice Director at Q Center (SKKU), and Head of R&D at Qunova Computing.

Armelle Levieux is a Vice President of Innovation, overseeing the Hydrogen Energy and Electronics world business lines as well as the Global Markets & Technologies division at Air Liquide. Armelle joined Air Liquide in 1996 and held several roles in Business Development, Strategy and European Operations.

Audrey Schweitzer is a General Manager of Ipsen Korea with over 20 years of experience in Pharmaceutical industry. Since joining Ipsen in 2011, Audrey has held various positions and assumed the role of General Manager of South Korea in 2021. Audrey also holds a position of a Board Member of CCE Korea- French Foreign Trade Advisors
